## OVERVIEW

Snap2sell is a project that eases selling secondhand stuff to an interested buyer without moving out of your house. Similarly, it makes it easy for the people who are interested in buying used stuff for their own use. One can easily click and upload the images of his/her belongings and post it to the application and prospective buyers can find that stuff from a various navigation tools available within the app. The app is also available in multiple language that diversifies its functions and area.

## SOLUTIONS

Google Map Integration  
Payment Offline  
Multi-language – Russian, English, etc.  
Chatting Modular  
Media Compression Technology  
Material Theme
